Every such report shall be signed by the person making the inspection.

4. Where any person required by these rules, or by any special rule made under section 25 of the Indian Mines Act, 1901, to make any report is unable to write, he shall be present when his report is written for him, and shall have it read over to him, and shall attach his thumb-print to it. The person making the report shall also sign his name at the end, together with a statement that it has been read over to the person for whom it was written.

5. All books which are required to be kept under these rules, together with a copy of the Indian Mines Act and of all rules applicable to the mine shall be kept in a convenient place adjacent to the mine, and shall be produced on the request of an Inspector of Mines, a Magistrate, or any person authorized in that behalf by the local Government.

Books and rules to be kept in a convenient place.

PART II.

ROCKE SHAFTS AND OUTLETS.

6. (a) At every mine, other than an open quarry, where more than 20 persons are employed below ground or where, in the opinion of the local Government it is necessary, there shall be at least two shafts or outlets affording separate means of ingress and egress available to all the persons employed in the mine.

(b) Proper arrangements shall be made for persons to descend to and ascend from the mine at each of such shafts or outlets. If apparatus is necessary, it shall be kept on the works belonging to the mine, and shall be constantly available for use.

(c) Such shafts or outlets shall not at any point be nearer to one another than 20 feet.

(d) The foregoing provisions of this rule with respect to shafts and outlets shall not apply—

- (i) while a shaft is being sunk or an outlet being made;
- (ii) in any working for the purpose of making a communication between two or more shafts or outlets.

(e) In cases where there are special difficulties which make compliance with the foregoing provisions of this rule not reasonably practicable, the mine may be exempted therefrom by the local Government, subject to such conditions as it may think fit to impose.

PART III.

VENTILATION.

Ventilation in shaft, through working place.

7. An adequate amount of ventilation shall be constantly produced in every mine to such an extent, that the shafts, tunnels and working places of the mine and the travelling roads leading thereto shall be in a fit state for working and passing thereon.

PART IV.

EXPLOSIVES AND EXPLOSIONS.

Storage of explosives in mine

8. No explosives shall be stored in the mine

Second class or lower by taking explosives in mine

place of more than one of such cases or boxes

Detonators

Iron or steel implements

Warning to be given before and after blasting

12. If a shot has, or appears to have missed fire, no person shall approach the place until at least one hour has elapsed unless the shot has been fired by electrical means when the interval may be reduced to 15 minutes after the battery has been disconnected.

Machine

Removal of things from holes which have been charged

New shot-holes

16. If a shot has missed fire, no new hole shall be commenced within twenty fathoms from the hole in which the misfire occurred and any shall be taken to drill the hole in such a direction that there is no danger of touching the unexploded charge.

The new hole shall be bored in the position of the misfire or of the person who examines daily personal supervision near the mine, or that station thereof and also, if possible, of the man who bored the hole in which the misfire occurred.

PART V.

SAFETY OF PERSONS EMPLOYED.

Roofs and sides of travelling roads and working places

Overhauling, loose ground and material

Sides of open workings

Steps in open workings

Exposure of exposed and dangerous parts of machinery

22. Where an engine or pump is used for the revolution and inspection of steam-boilers and pressure vessels in the mine being worked, every steam-boiler, whether separate or out of a range, shall have attached to it, a proper safety valve, and also a proper steam gauge and water gauge to show respectively the pressure of steam and the height of water in each boiler.

PART VI.

MISCELLANEOUS.

Warning of dangerous places in the mine

Warning of dangerous places in the mine

23. Where a place is likely to contain a dangerous accumulation of water, the working approaching that place shall not at any point within 50 feet thereof exceed six feet in width or height, and there shall be constantly kept in a sufficient drainage, not being less than five feet in clearance, at least one foot-hole near the centre of the working, when free from coal, rock, where necessary, above or below.

24. A sufficient supply of good drinking water shall be provided or kept in or near the mine, so as to be easily accessible to all persons employed in or about the mine and such shall be taken to ensure that the supply cannot be cut from the mine.

- * The candidates for admission to the examination will be held with the practical test in painting, if necessary.
 (A) Two days including the preliminary test.
 (B) Four days including the preliminary test days.

4. Attention is drawn to the following rules:—

(1) No candidate will be allowed to enter the examination room unless he wears a clean and decent dress, and, in all cases where great accuracy requires it, a suitable covering for the head, and will be allowed to keep his shoes on when they are above of English pattern, and socks and trousers are worn also.

No candidate suffering from any contagious disease will be admitted to the examination room.

(2) No candidate will be allowed to quit the examination room on any day until the expiration of half an hour from the time fixed for the commencement of the examination, and candidates arriving after the expiration of that half hour will not be admitted.

(3) No candidate will be allowed to re-enter the examination room during the hours of examination after once quitting it, nor to leave the room without firstly giving up his answer paper.

(4) Any candidate detected in speaking to, or in any way communicating with, any other candidate will be at once removed from the room and the circumstances reported to the Commissioner.

(5) Any candidate suspected of having had recourse to espionage of any kind is liable to have his examination cancelled and also to be debarred from appearing again for any of the examinations under the sanction of the Commissioner for each term of years as the Commissioner may think fit; or, if the Commissioner is not satisfied for any reason whatever as to the lawfulness of his entry, he may be required to undergo a re-examination at some future date to be fixed by the Commissioner in any one or more of the subjects of the examination for which he appeared, his success or failure being determined on the results of such re-examination.

(6) No candidate will, in any manner, be allowed to take into the examination room ink, blotting paper, or paper of any kind. Any one detected in the violation of this rule on having recourse to any writing material will be removed from the room, and the substance reported to the Commissioner. The use of mathematical instruments for drawing figures or ruling lines will, however, be allowed.

(7) Candidates whose names are not in the printed list furnished to the Superintendent must submit a written declaration through the Superintendent, giving full particulars as regards themselves and furnish such evidence as may be possible of their having applied for admission to the examination at the proper time and paid the prescribed fees. The answer papers of such candidates will not be valued unless it is clear that the names of these candidates are due to no fault of theirs.

(8) Candidates desiring to change their place of examination without previous permission, as appearing at any other place than the one at which they might be expected to appear, or in the venue published in the Gazette, must not expect to have their papers valued or their results published. In all cases where permission has been granted, the Commissioner is better providing the change should be produced for the satisfaction of the Superintendent.

(9) A candidate having completed his paper will give from his seat and remain standing until the Superintendent takes his answer papers. Any candidate wishing to ask any question of the Superintendent will pause the same moment, but will not so account leave his place.

(10) Any paper sent up without the candidate's name and number stated will not be examined.

(11) Candidates will not be allowed to take any papers, except their question papers, out of the examination room.

(12) Candidates are forbidden to tear up papers or to throw ink or papers on the floor. All "spilt copies, etc." should be left on the desk where the candidate has been writing.

NOTIFICATION.

Whereas it has been found necessary to take steps to control the production, possession and sale of denatured spirits in the Madras Presidency, the following rules have been framed by the Board of Revenue, under section 2, Act XVI of 1903, and sections 53 and 55 of the Alkali Act 1 of 1869, in that regard in pursuance of the provisions contained in Notification No. 1, dated 7th February 1910, published on pages 221 and 222 of the Port St. George Gazette, dated 24th February 1910, Part II. They will come into force from and after 1st January 1911:—

1. Denatured spirit is spirit rendered effectually and permanently unfit for human consumption by the admixture of light carbolic acid and crude pyridine bases wholly or in part, a mineral source, or wood-naphtha, or other special denaturants, approved of by the Board of Revenue.

2. Denatured spirits are liable to a duty of 5 per cent. of value: the duty being calculated on the declared value price of such consignment at the distillery, less the duties, if any, allowed to purchasers and the duty. Distillers should, when applying for a permit, declare the sale price of the spirit at the distillery for the purpose of calculating the said excise duty.

3. Denatured spirit may be manufactured by holders of distillery licenses in the Presidency, provided (1) that the light carbolic acid and pyridine bases to be mixed with the spirit must first be tested and approved in the Board's Laboratory, (2) that they must be kept under the lock and key by, and used under the supervision of, the distillery officer, (3) that they must be used in the proportion of $\frac{1}{4}$ a gallon of light carbolic acid and $\frac{1}{4}$ a gallon of pyridine base to 80 gallons of the spirit, and (4) that the spirit shall not be of less strength than 50 per cent. over proof. Similar conditions apply to the use of wood-naphtha, in the special cases where its use is permitted, with this difference that one part by volume of crude wood-naphtha shall be mixed with nine parts of spirit and that the use of wood-naphtha in a highly purified condition will not be permitted. The Board's previous sanction should be obtained in cases of special methods of denaturation for spirit intended for use in particular arts and manufactures.

4. Spirit denatured with light carbolic acid and pyridine bases may be imported by sea, but samples must be submitted to the Board's Laboratory and there certified to be fully denatured before removal from the Customs-house can be permitted. In the case of spirits by sea from other Presidencies a certificate from the Collector of Customs at the port of shipment to the effect that the spirit has been fully denatured may be accepted in lieu of the Board's

report. Spirit that is not sufficiently denatured must either be denatured afresh or must pay duty at the full tariff rate. Spirit treated with wood-sulphite or other special denaturants may be imported only with the special sanction of the Board.

6. Licences (M.S.—1) for sale of spirit denatured with light carboxylicine and pyridine bases will be issued by the Collector, free of fee, to respectable applicants on their showing that they have a legitimate demand for such spirit. All such applications should be forwarded to the Collector through the Inspector of the Salt, Alkali and Customs Department of the Circle in which the applicant wishes to hold his licence. The issue of licences to persons licensed to sell liquor for consumption on the premises is prohibited.

6. The holder of M.S.—1 licences may obtain their supplies of spirit from the custom-house or distillery on production of a written permission (M.S.—2) from the Collector or the district in which the custom-house or distillery is situated for the removal of the same. Books of form of applications for such permission (M.S.—3) will be supplied to them. These applications should be forwarded to the Collector concerned through the Collector of the district to which the applicant wishes to transport the spirit. The licences are also empowered to sell spirit in one cask and to holders of M.S.—1 a licence up to a maximum of 25 gallons at a time. The transport of spirit thus sold should be covered by a permit to be granted by the seller in each case. Books of permits (M.S.—4) for the transport of the spirit to be obtained from holders of M.S.—1 licences in quantities exceeding one gallon but not exceeding 25 gallons will be issued to holders of these licences on application to the Collector of the district in which they carry on their business.

7. Varrack-makers and others requiring spirit denatured with light carboxylicine and pyridine bases for use in their business, but not for sale, will be given special licences (M.S.—1-a) on application, supported by evidence as to their requirements through the Inspector of the Circle, to the Collector of the district in which they carry on their business. They will be supplied by distilleries or through the custom-house on presentation of a permit (M.S.—2-a) to be obtained from the Collector on application in form (M.S.—3-a). These licences may also obtain their supply of spirit from holders of M.S.—1 licences up to a maximum of 10 gallons at a time.

8. Holders of M.S.—1 and M.S.—1-a licences will, on application to the Collector of the district in which they carry on their business, be furnished with books of requisitions (M.S.—8) authorizing them to obtain spirit denatured with light carboxylicine and pyridine bases in quantities exceeding one gallon but not exceeding 20 gallons at a time from holders of M.S.—1 licences.

9. Similar licences (M.S.—1-b) will be given to Chemists and others who, for special reasons, require spirit supplied with wood-sulphite. The procedure will be the same except that (unless the Board has given a special authority to import) the spirit will be obtainable only from local distilleries and that the licences will be required to enter into a bond (M.S.—1) with the Collector undertaking to use the spirit for the purpose specified and no other. The forms to be used in this case will be M.S.—1-b, M.S.—2-b, M.S.—3-b. Persons holding these licences will also be allowed to sell such spirit up to a maximum of one repeated quart at a time, on the use of it being ordered in writing by a competent medical man. Such orders are to be retained by the seller in his stock book until the latter is inspected by an Alkali officer.

10. A special licence in form M.S.—1-c will be issued to the Railway Companies in the Province for the storage and use of spirit denatured with light carboxylicine and pyridine bases and its distribution to such vehicles on their respective lines, as may be specified in the licence, provided that the licencees enter into bond with the Collector undertaking to use the spirit for the purpose specified in the licence and no other. The licencees may obtain their supplies of the spirit from the custom-house or distillery on production of a written permission (M.S.—2-c) to be obtained from the Collector of the district in which the custom-house or distillery is situated on application in form M.S.—3-c. The Railway Companies will be exempted from taking out separate licences for individual vehicles for the purposes and use of the spirit received from the M.S.—1-c permission. The transport of spirit should be covered by a permit (M.S.—4) to be granted by the licencees in each case.

11. The Customs or Distillery officer concerned will send an advice in form M.S.—5 of each issue of denatured spirit that he makes to the Inspector of the Circle in which the spirit is concerned. This advice must be sent promptly at the time of issue. No issue of more than 125 gallons at any one time to any one person is permitted. This limit will, in the case of holders of M.S.—1-c licences be extended to 250 gallons.

12. Undenatured persons are prohibited from selling denatured spirit, and from possessing more than one gallon at a time. The limit is laid under section 13 of Act I of 1894. Breach of this rule will subject the offender to the penalties prescribed in the Act.

13. When insufficiently denatured spirit is again denatured under rule 4 *supra*, the importer will bear the expense.

14. The minimum strength at which imported and locally-made denatured spirit can be sold will be 50° over-proof.

MADRAS STATIONERY DEPARTMENT

THROUGH THE THEATRE OF TERNATION AND AFFILIATION ACCORDING

Source: Records for the supply during the year 1911-1912 of all or any of the typewriting and dictating machines mentioned in the appended list will be received by the Superintendent of Machinery, India, with a 10 anna tender by 12th December 1910.

Research Questions

1. Tenders should be accepted as Tenders for typewriting and dictating machines and other of the kind which the tenderer undertakes to supply the article. Every machine, in the case of articles falling under Parts II and III, be accompanied by a copy of the articles proposed to be supplied and by a deposit of 5 per cent on the value of the tender. This deposit should be retained into the Bank of Malabar and the Bank's receipt given to the tenderer. No money will be accepted.
2. Tenders are not to be made by tender under any one or more parts of the notification.
3. Articles and things supplied by the successful tenderer shall be in accordance with the accepted samples and shall be subject to inspection and acceptance or rejection by the Superintendent of Machinery at Malabar.
4. The successful tenderer will be required to deposit 10 per cent of the value of his tender together with the necessary stamp duty and to sign a contract bond (form of which can be seen at the office) within 15 days from the date of his being informed of the acceptance of his tender. In case of failure to do deposit of 5 per cent delivered with the tender will be forfeited and his tender considered to be cancelled.
5. The quantities mentioned in the appended list are only approximate; the actual quantities required will be indicated to the contractor from time to time and should be delivered at the cost and risk of the contractor at the Station office, and delivery at any other place specified by the Superintendent of Machinery punctually on the dates fixed in the orders issued, failing which the terms of the contract bond will be strictly enforced.
6. The Superintendent of Machinery reserves to himself the right of rejecting any tender without assigning any reason for so doing.
7. Forms of tender and any further information may be obtained on application to the Stationary office after 10 a.m. by post or made personally on any day after 10 a.m. and before 4 p.m.

The Standard Barometer and Thermometers are read at 8 A.M., 10 A.M., 4 P.M. and 8 P.M., and the daily means are obtained by the application of hourly corrections, deduced from twenty years' observation. The centre of the Barometer is twenty-five feet above the level of the sea, and the receiver of the Rain Gauge is two feet from the ground. The wind, rain and general weather recorded are for the current Civil Day—from midnight to midnight.

The total quantity of rain collected since January 1st is 42.81 inches, the average due for the same period being 39.50 inches.
